2019 *is a year of Renewal & Joy*

*2019 begins with a bang!
We launch the year with a
New Moon Solar Eclipse in Capricorn.*

Solar Eclipses are like a reboot of your consciousness. They bring profound changes to how you share your light with the world. Often, during an eclipse, things are brought to light in a new and life-changing way.

Here are questions to ask yourself:

- How can you share your light more brightly with the world?
- Have you been dimming your light in any way because you're afraid of how people will perceive you?
- How can you view your career and life in a new and innovative way?
- How can you have more fun and playfulness with your projects?
- Are you being unique and true to yourself or trying to be like other people?
- What can you do this year that is totally new and different?
- What connections can you make with others so you are more visible?

*2019 ends with a shabang too!
Another New Moon Solar Eclipse in Capricorn.*

In addition to our first lunation of the year being a New Moon Solar Eclipse in Capricorn (on January 5th) - our last lunation of the year is also a New Moon Solar Eclipse in Capricorn (on December 26th). Yes, 2019 is a Solar Eclipse sandwich!

These eclipses on either end of the year mark a new way of living, a restructuring of your foundations and how you relate to the material world.

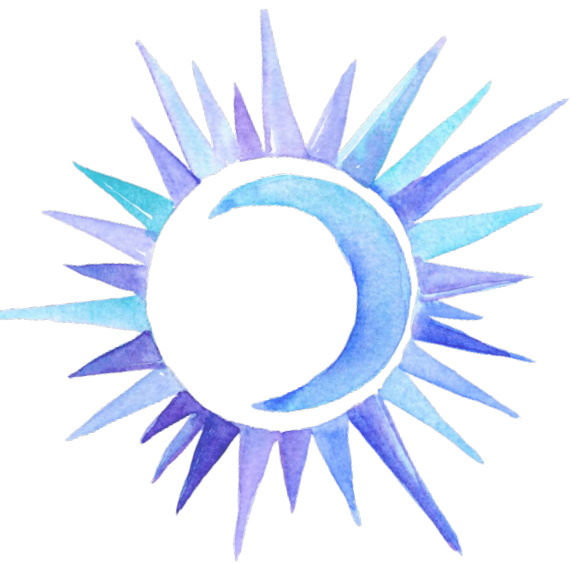

You will see yourself and the world in a whole new light. You will learn innovative and creative ways of being, while re-inventing how you see and experience the world.

Such illumination awaits you!

Spectacular Supermoons of Illumination

This year we experience three Supermoons and five eclipses.

The first three Full Moons of the year are Supermoons in the zero degree of their respective sign!

This is quite extraordinary.

The first or "zero degree" (0°) of each sign as well as the last degree (29°) have special meaning and power. They are supercharged with potential for manifesting and mastery.

Planets at 0° of a sign indicate a new beginning, an initiation into a new realm of experiences and soul lessons.

During these first three Full Moon Supermoons, the Sun and Moon will be in the same sign at 0° with the amplified energy of the Supermoon's magnetism.

The very first Full Moon Supermoon is also an eclipse. This initiates you on a path of pure potential for new beginnings and opportunities. You are stepping into new horizons of growth and possibilities.

You must let go of outdated energies, patterns, thoughts and habits for you to

align yourself with higher energies. This might mean you change careers, let go of relationships so you can forge new ones and transform your lifestyle.

You likely won't recognize your life by the end of the year. So many possibilities will avail themselves to you.

Take a chance on yourself and make the changes that are in tune with your heart!

Your Chinese Astrology for 2019

Year of the Earth Pig

Tuesday February 5th is the Chinese New Year in 2019, ushering in the Year of the Earth Pig!

This is a time of celebration. The Pig is the 12th animal in the wheel of the Chinese Zodiac, so this is a culmination of a 12 year cycle. You can bask in the glory of all you have accomplished over the past 11 years and reap the rewards.

The previous two years of Rooster and Dog were a bit more competitive. Even though Dogs can be group-oriented animals, there are those who desire to be top dog and leader of the pack. There are also those Roosters who need to be at the top of the pecking order. The past two years have shown the ugly side of what people would do to get to positions of power.

Pigs bring a more gentle energy to group antics. Plus a lot of fun!

Super-smart squealers, pigs have a very complex form of communication. They have a variety of oinks and squeaks that signal a cohesive language that pigs share.

The creative, expressive and cooperative themes of the 3 Universal Year are aligned with our sociable Earth Pig's energy.

Pigs are social and amicable creatures. They love to socialize, and they're also quite affectionate. These cuddly creatures sleep nose-to-nose!

Pig years tend to bring up deep and buried emotions (as does the number 3), so expressing your feelings is paramount. This is not a time to hide or repress what's in your heart. The more direct and honest you are with your feelings, the more you will be loved for who you are.

Earth is the slowest and most practical element of the zodiac. Pigs love luxury, so you'll want to watch your finances (and your diet) to make sure you're not indulging too much, and that you're taking steady deliberate steps toward realizing your dreams.

Enjoy the delightful energy that the Earth Pig brings!

Your Numerology for 2019

2019 can be as easy as 123!

In numerology, 2019 is a 3 Universal Year.

We get this by adding the numbers $2+0+1+9 = 12$

We reduce this double digit number (12) by adding $1+2 = 3$.

If you're living in alignment with your Higher Self and the energy of the planets, you can feel everything is lining up in your favor.

When you see the 1-2-3 lined up like that, it's also a time to get your ducks in a row!

During a 3 Universal Year, you will be more in touch with your feelings. It's an ideal time to be creative and express what has been in your heart that you've been previously afraid to share with the world.

This is your year to create what you've been dreaming of for years!

Time is your Great Teacher

The number 12 is associated with time. We have 12 hours in a day, 12 months in a year, 12 signs of the zodiac and 12 notes in the musical chromatic scale.

Life on Earth is an illusion, yet it is very real. Just like gravity, we must learn to live with the laws of time.

With Saturn and Capricorn being so prominent this year, you must learn to master the energy of time management. This requires you to have proper boundaries and to prioritize what is truly important to you.

You must let go of people and circumstances that drain you, so you can be liberated to pursue your deepest heart's desires.

If you ever feel as if you can never accomplish what you desire, take to time to yourself to discern what you can let go of. As you value your time and energy more, the Universe will respond in kind.

19

The Sun

Since the number 19 is at the core of this year's number, we'll be influenced by the radiant energy of 19 all year.

The 19th card of the Tarot is the Sun. The Sun comes after a series of what are known as the "nighttime cards". After the journey of the "dark night of the soul", The Sun appears to signal rebirth, regeneration, renewal, joy and healing.

Thank heavens! It's been an intense few years. Though of course, we have significant spiritual lessons this year, (it's a sign you're alive!). There's an uplifted energy in the air, and you can finally see and feel the light!

Physical and emotional healing will be themes throughout the year. You might want to eat more high vibrational foods that help you feel lighter, and do exercise that feels good because it's fun, not just because you're told it's good for you.

Creativity and light-hearted fun abound!

Since 1 is the number of beginnings and 9 is the number of endings, and 19 reduces to 1 (1+9 = 10, and 1+0 = 1), make sure to let go of any obligations, thought patterns, relationships and activities that don't light you up inside. Make room for new growth and let the Sunshine in!

It's time to let us see who you really are. You'll make the world brighter simply by being yourself.

The Hanged Man

12

Like most things in the Tarot (and life), this card looks more frightening than it actually is. If you look closely at the card, the person is unharmed, hanging by his foot with a radiant halo around his head. The tree he is hanging from has deep roots and stretches up toward the heavens.

You might experience the energy of reversal this year. This energy teaches you to "Let go and let God". If you get "hung up" on anything and feel you're not moving forward, it's because you're meant to look at life from a completely different perspective. Oftentimes, if your plans aren't going the way you would like, it's because Spirit has something even greater planned for you.

In order to get to the place where you are being guided, you might need to do something completely different. For instance, if you have always worked for other people, perhaps now it is time to become self-employed. Or perhaps if you have always lived in the city, you might consider a move to the country. A reversal from your routine is what might lead you in the right direction!

You might be asked to sacrifice something you thought you wanted in order to gain something greater than you could have imagined.

In order to get to the place where you are being guided, you might need to do something completely different.

The Empress

What a beauty she is! It's no wonder the Empress sits on a heart-shaped throne with a Venus symbol embedded into it.

The Empress reminds you of earthly delights and sensual pleasures, as well as the joy of creativity. Traditionally, the Empress is known as the card of pregnancy and fertility.

You are a powerful co-creator. Through the power of love, and self-love, you can create a world of beauty, joy, and fulfillment.

Focus your heart, your mind, and your words on love, and what you want to create, instead of what is displeasing to you.

As you fill your life with beauty, love and creativity, as well as connecting with others who make you feel good, you can make your life and the world a better place.

Remember to enjoy time in nature, and mother yourself as you do others (no matter what your gender).

who you are from the world. The woman wears a circular wreath representing her victory over obstacles and the cycle of beginnings and endings.

This is a year of culmination for you - celebrating your accomplishments, basking in the joy of being, and experiencing the fullness of who you were born to be.

So much joy and freedom is yours to claim! Bounty is yours when you remain true to yourself and do what makes your heart sing, rather than what others tell you to do.

The Minor Aracana

3

These cards illustrate the growth, emotional expansion, creativity and cooperation that the 3s can bring. You'll experience much joy here and even some heartache. The full range of emotions is expressed and enjoyed, making for a very full life. As you tune into your heart and share what's inside of you in the spirit of harmony, your life will be fulfilled in the most joyous ways.

Cosmic Cycles

New Moons

The beginning of the lunar cycle is a wonderful time to set intentions and plant seeds for new beginnings. When the moon is new, the sun and the moon are in the same sign intensifying its energy. A lovely ritual during the new moon is to light a candle and declare your intentions to the Universe. As the moon's light waxes, your intentions will manifest.

Full Moons

Energy is amplified during the Full Moon, including your emotions. Things will be brought to light that have been previously hidden from view. The sun and moon are at opposite signs in the zodiac, creating the need for you to balance and integrate your inner self with how you express yourself in the world. The intentions that you created during the New Moon are now bearing fruit. You can use this time to release what no longer serves your higher purpose, and give gratitude for what has already manifested.

Planetary Retrograde

When a planet appears to be moving backwards from the Earth's perspective, it is called "retrograde". During the a planet's retrograde cycle, the planet's energy you experience is directed inward. It's a time to revisit the lessons of that planet and integrate its lessons.

Super Moons

When the moon is closest to the Earth's orbit (within 90%), whether it's a full new moon is called a SUPERMOON. This will intensify the energy of the moon's power, thereby magnifying your emotions and intuitive abilities.

Eclipses

Eclipses bring about transformation. They can represent major change in your life, often long lasting. A solar eclipse occurs during a new moon and illuminates where you can have new beginnings. Lunar eclipses occur on full moons and can reveal deeply covered feelings, so they can be brought to the light to be integrated into your consciousness.

Mercury Retrograde

Mercury, the planet that governs our communication, thoughts and mind, gives the illusion of moving backward three times per year. When this planet is in retrograde, this is a good time to reflect, revisit and re-evaluate. All of the Mercury retrogrades in 2019 will be in Earth signs, guiding you to ground your ideas into practical reality through action.

Major Planetary Influences

The stars are aligned!

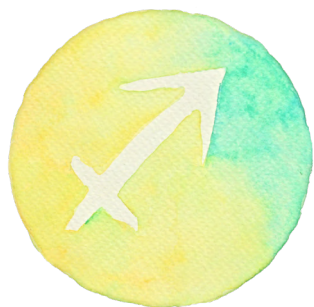

This year, three prominent planets are in their home signs - Jupiter, Saturn and Neptune. These are outer planets and affect society and the world as a whole. When a planet is its home sign (the sign it rules), the energy of that planet is magnified. You'll get a double-dose of the planet's blessings and bounty as well as the spiritual lessons it offers.

Such harmonious placements of these planets will mean we can all feel more ourselves and less awkward about the changes we are making. This will help give you the impetus to be more comfortable with sharing your authentic self with the world, and living your truth.

Jupiter in Sagittarius:

November 8, 2018 - December 2, 2019

Lift your hands in the air and say, "Squeeee". Jupiter is happy and at home in this optimistic sign. Buoyant, broad-minded Sagittarius is ruled by joyful Jupiter, so this is a very pleasant placement. Travel, publishing, teaching and learning will all get a boost throughout the year.

Embrace the spirit of adventure and explore the world - either in your imagination or in real-time. This is a wonderful time to learn new things and have fun.

Jupiter is broad-minded and boundary-breaking. People will begin to see how we are all more alike than different. This bodes well for a more peaceful way of relating on the world stage, and perhaps on social media as well!

Abundance is Jupiter's wheelhouse, so make sure you dream big AND act on your inspiration. The Universe will help you reach beyond the stars!

Major Planetary Influences

Jupiter in Capricorn: December 2nd 2019– December 19th 2020

On December 2 Jupiter joins Saturn and Pluto in the slow-and-steady sign of Capricorn.

Jupiter had its fun in fiery Sagittarius (and we enjoyed the journey), now it's time to reign in the expansion and set some healthy limits.

Jupiter in Sagittarius is fun, but sometimes too much abundance is literally too much. It's like gorging yourself at an all-you-can-eat buffet and realizing you never really liked jello but it looked so good at the time...

Capricorn is ruled by Saturn, the planet that teaches you about boundaries, time-management and limitations.

Jupiter's nature is to expand, and Capricorn is cautious, so these two are inherently at odds in this uncomfortable placement.

Yet, Capricorn's hard work always pays off, like the goat climbing step-by-step up the mountain ultimately reaching the top.

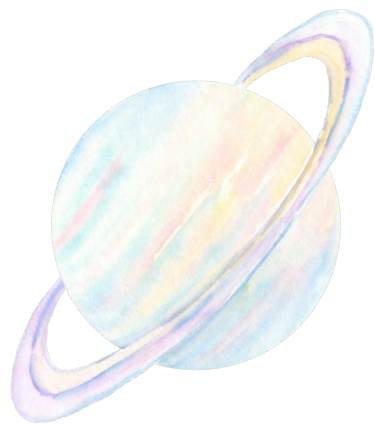

Jupiter in Capricorn will teach you how to set your sights high, and have the discipline to do in the world what is necessary to make it happen.

Saturn in Capricorn: December 19th 2017– December 17th 2020

Saturn by nature is not an easy planet. It is known as the Great Limiter, creating boundaries and restrictions wherever it goes. And by doing so, it is also known as the Great Liberator.

Nobody likes limitations or being told "no!", yet like a cosmic parent, Saturn knows it's for your own good.

Restrictive Saturn is at home in the stable sign of Capricorn, since Saturn rules this stalwart sign. Having Saturn in its home sign can feel very ground-

Major Planetary Influences

ing, helping you have the discipline to achieve your goals and create financial stability in a career that you love. Yet Pluto, the planet of deep transformation and buried secrets, is also in Capricorn, and will be until 2026.

Capricorn is the sign that governs status, achievement, tradition, foundations and government, as well as all things male and the “patriarchy”.

Since Saturn and Pluto are BOTH in Capricorn, all things related to our foundations, government and the rule of law are getting a major overhaul. Pluto wants to reveal the shadow side of our foundations, yet Saturn wants to create more restrictions and thwart change. This tug-of-war will continue throughout the year until 2020.

Structural flaws in the foundations of your life and the world will be revealed. Foundations will be put to the test to see if they are built on stable ground. If there are fissures and cracks, perhaps things will get torn down and rebuilt better than before.

The areas of your life that you've put the hard work into will become stronger and better than ever before. If you've been true to yourself and built your life with integrity, you will thrive in ways that you previously could only dream about!

Pluto in Capricorn November 27 2008 – January 21 2024

Pluto is a truth seeking planet. It doesn't care about comfort, it only wants to uncover what is hidden beneath the surface.

Saturn rules what is tangible in the physical world, and all the structures of our life. Pluto governs what is unseen and underground.

Because Saturn and Pluto are BOTH in Capricorn, you can expect some revelations about people in power (both globally and personally) as well as some shifts in our global economy. These shifts may seem shocking at first, yet the truth will set you free!

Major Planetary Influences

Uranus in Taurus: March 6th, 2019 - April 26th, 2026

Revolutionary Uranus visits each sign every 84 years, stirring up transformation in that sign for a seven-ish year stretch.

Uranus is the change-maker, and not-so-subtle in its quest for transformation.

Like lightning, wherever Uranus treads you can expect shocking revelations and sudden changes.

Quick-moving Uranus is verrrrrrry uncomfortable in slow-moving, earth-loving

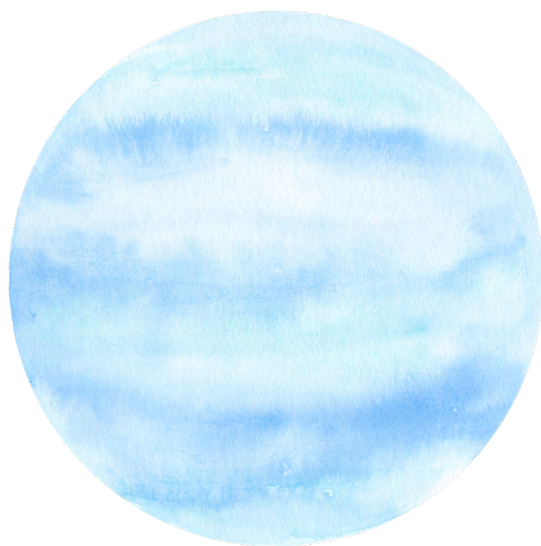

Taurus. Wherever Uranus wants to break-on-through-to-the-other-side, Taurus likes to keep things safe and secure and take its time, thank you very much!

Since Taurus governs all things we value including the Earth, art, beauty, real-estate, and money, you can expect some shake-ups in all of these areas - including actual earthquakes.

We'll most likely see a boom in crypto-currency (since Uranus also governs electricity), as well as an unstable economy, (Taurus' bull market will be affected) and a housing market bubble burst.

The positive side of this is revolutionary developments in green energy, innovative ways of doing commerce, housing collectives, and art that pushes the boundaries.

When Uranus is activated, there's no way to truly predict what will happen. You can expect the unexpected regarding all things that make us feel secure. It's all for the good. Just hold onto your seat-belt!

Major Planetary Influences

Chiron in Aries: February 18th, 2019 - April 14th, 2027

Chiron is known as the “wounded healer”. Whenever and wherever Chiron shows up, there will be a focus on a trauma or pain-point that needs to be worked through, and in doing so becomes one’s strength and gift to the world.

Though currently classified as a comet (formerly an asteroid), Chiron is a close runner-up as a planetary co-ruler of Virgo. Chiron typically changes signs every eight years, and is doing so in 2019.

This marks the beginning of a new era of self-inquiry and healing.

For the next eight years, we will all collectively be looking at how we fit in individually. Sounds paradoxical doesn’t it? Yet, each star in the sky is what makes the heavens so beautiful. Every drop in the ocean is significant.

There is only one of you in this world. There will never be another person who has your unique perspective, personality or talents.

During this transit, you will learn just how important YOU are.

Aries is a fiery aggressive sign that gives you the courage to believe in yourself and BE yourself.

During the next eight years, our wounds around the “divine masculine” will be revealed. Standing up for oneself will be paramount. People-pleasing at the expense of yourself will be a thing of the past.

You can expect these core wounds within you and in the world to be in bold relief. By doing so, we will have a collective of authentic and courageous individuals who dare to shine brightly. What a wonderful world full of stars!

Notes

January is a 4 Universal Month

WOW! This is a spectacular beginning to an extraordinary year! We initiate the year with a powerful New Moon Solar Eclipse in Capricorn. Solar eclipses often bring fateful events and bring clarity to your consciousness. You have the opportunity to let go of what isn't serving you so you can focus your intentions on building your dreams.

4 is the number of structure and foundations. As you release your fears and limiting beliefs, and let go of outdated ideas, beliefs and circumstances, you can rebuild the structures of your life on more solid ground.

The day after the Solar Eclipse (January 6th) Uranus goes direct, giving you free and clear skies for forward movement for two months - no retrogrades! It's full speed ahead with building your dreams on a foundation that supports the true you. You will be expressing those aspects of yourself that have been previously eclipsed. It's time to shine!

January Intentions :

January 2: Sun conjunct Saturn

This is a once in a year connection that is happening right at the beginning of 2019! This planetary meetup sets the tone for the entire year. Saturn is a planet of structure, boundaries, time-management and healthy limits. It is a practical planet that helps you have the discipline to do the tasks, mundane or otherwise, to help you make your dreams a reality. If you stay focused on what is healthy and strengthening for you and set boundaries around the people, places, and circumstances that do not serve your higher purpose, you can climb to new heights this year.

January 4 - 24: Mercury in Capricorn

Yes, more Capricorn. Mercury will join Saturn, Pluto, and the Sun in this stable and sometimes serious sign. Capricorn is ruled by Saturn, so there's a whole lotta stability going on at the top of the year. This will set your mind on achieving your goals and help you have the discipline to achieve them.

January 5: New Moon Partial Solar Eclipse in Capricorn ●

This is a spectacular start to the year! Powerful long-lasting alliances are often made during New Moon eclipses. Since this one is in the stable ambitious sign of Capricorn, the connections you make now will help you build lasting foundations for your future - especially in the realm of career and how you wish to be seen in the world. Listen to your intuition; you can do this by spending time in meditation, reflection and visioning your future. Connect with your Spirit Guides and Angels by asking them to show you the path of your destiny. Pay attention to any images, thoughts and feelings that come to you. Set your intentions on how you would like to fulfill your soul's purpose. Since Capricorn is a practical Earth sign, this is a great day to do physical things to declare your intentions to the Universe. Writing in a journal would help you connect to your inner voice. Take a walk in nature. Map out your plans. Your dreams really can come true!

January 6: Uranus Retrograde ends

There won't be any more retrogrades until March 5th. Hooray! This gives you two months of free and clear skies. Uranus has been retrograde since last December, keeping you from making hasty decisions. Now it's time for radical changes! At least until Uranus changes signs in March.

January 20 - February 17: Sun in Aquarius

With the Sun in the sign of the revolutionary change-maker, this is a wonderful time for you to focus on how you can help the greater good with your unique vision and gifts. Think outside the box. See the bigger picture. Be yourself!

January 21: Leo Full Moon Total Lunar Eclipse ○ (Supermoon at 0°)

The first three Full Moons of 2019 are all Supermoons at 0°! Supermoons amplify emotional lunar energy. The zero degree of each sign is power-packed with pure potential. This is an opportunity for a total reset. Since Full Moons help you release what isn't serving you, (exponentially so during the Supermoons and eclipses), you can let go of anything that is holding you back from joy and abundance. Don't be afraid of standing out bigger and bolder than ever before. Embrace those Leo-like leadership qualities and allow yourself to shine more brightly.

January 24 - February 10: Mercury in Aquarius

Aquarius is a visionary sign that promotes innovative ideas. You've been focusing on what's practical the past few weeks; now you can set your mind on breaking barriers to what you previously thought was possible!

January Reflections :

February

February is a 5 Universal Month

Get out there and strut your tail-feathers! It's time to be seen! 5 is the number of groups, the media and also sensual pleasure. It's also a number that initiates CHANGE! If there are any routines that aren't lighting your fire, make some changes. Try new things and have adventures!

You'll need to be adaptable and quick on your feet. Take risks. Try new things. Experience adventures. Use your imagination. Have fun!

The Aquarius New Moon is the perfect pairing to this month's numerology. Aquarius brings change and surprises and favors group activities. This New Moon also ushers in the social-oriented Year of the Pig. Let the festivities begin!

This dreamy sign fuels your imagination and connects you to your soul. Use this month to tune into your intuition, which will be heightened now. Pisces reminds us that we're all ONE - connected. February Reflections :

March is a 6 Universal Month

6 is the number of Love!

Your relationships will be in full focus. You'll begin to see whether they are empowering you or depleting you. 6 can sometimes bring light to the shadow side of love such as perfectionism and feeling responsible for other people's happiness. Focus on self-love this month, making your own well-being a priority, and you will thrive.

6 is the number associated with children and pregnancy, so if you want to bring another being into this world - this could be your lucky month. Fur babies and creative projects count too! It's also a lovely time to beautify yourself, your home or your environment.

*6 is a creative, expressive and emotional vibration, intensifying the 3 energies of the Universal Year Number. The Sun is in dreamy, sensitive Pisces most of the month, connecting you deeper to your feelings and **enhancing your intuition**.*

Mercury is retrograde in Pisces - also for much of this month, which will help you connect your heart and your mind. Use your intuition to live your dreams!

7 is a number that always requires that you take time to yourself. 7 is also a number of TRUTH. We'll have three planets in retrograde, which promotes internal processing. Plus, both Saturn and Jupiter are conjunct the South Node (which relates to past life karma). It's sure to be a month full of transformation and revelations.

Your life might mirror relationships where you've allowed others to take advantage of you, or you gave away your power. You might experience situations that bring up your anger. This is simply the Universe's way of bringing your attention where you need to ACT on your intuition and put your passions first.

Scorpio's ruler Pluto just went direct in Capricorn this month. This will give you some momentum to transform your life in profound and positive ways.
