EMBODYING PLASMIC LIGHT FROM THE PHOTON BAND & ASTEROID BELT

PLASMIC LIQUID LIGHT – ONE OF THE FASTEST WAVELENGTHS OF LIGHT

PLASMA IS THE 4TH STATE OF MATTER

IT IS FOUND IN LIGHTNING STORMS & THE SUN NEBULA, SOLAR CORONA & IN THE STARS THE AURA OF PLASMA SURROUNDS THE SUN

As the dust settles since the Solar Eclipse, we are in a position to determine which direction society will move in. The incoming solar activity from the Great Central Sun and Earth’s Sun is blasting our human energy field as well as the planet’s geomagnetic field. On September 6th the sun unleashed the strongest solar flare in more than a decade. As your energy frequency increases, you are evolving from an extremely polarized field to a more neutral, smooth flowing field of unity consciousness – a non-polarized field of Love.

The Solar Eclipse opened Zero Point, where matter and anti-matter merge to create new realities. It is the null-zone where physical and spiritual unite.

The Accelerated Light Transmissions can establish more resonant coherence within our biological systems and between heart and mind. The more coherent your energy field is, the easier & faster it can be to absorb the divine galactic photon waves of higher consciousness into your life.

The Solar Eclipse ignited a process of Zero Point decomposition, where the old, corrupted, outdated patterns, programs, codes and trauma are collapsing and purging out of your system.

As you clear away the energetic debris of past history, karma, and traumatic wounding, your zero point vacuum initiates new cellular growth (electrons) in its place & creates renewal, self-generating vitality, health and wellbeing.

X-rays and UV radiation from the powerful solar flares ionized the top of Earth’s atmosphere. Interplanetary space, intergalactic space and distant stars are filled with plasma. The galactic surge of plasma energy into Earth’s crystalline grid has caused destabilization contributing to more earthquakes.

Plasma is often called the fourth state of matter, along with solid, liquids and gases. We find partially ionized plasma in lightning storms and fully ionized plasma within the sun nebula, solar corona and in stars. The corona visible during the Solar Eclipse is an aura of plasma that surrounds the sun. During the Zero Point Solar Eclipse, the stargate portals opened, streaming plasma frequency into Gaia’s crystalline gridwork and sacred vortex sites. Plasma is one of the fastest wavelengths of Light.

ACCELERATED LIGHT & TACHYON ENERGY

Accelerated Light works hand in hand with Tachyon Energy

This is why change occurs easier & faster when running Accelerated Light Processes The body is composed of electrical, magnetic, and Tachyon (subtle) energy. Tachyon energy also is referred to as Prana, Chi, Universal Life Force Energies, Aura, among other names. Our bodies are not only sensitive to, but are energetically balanced by, Tachyon energy. The word tachyon (Greek) translates as 'fast particle'. It is allegedly faster than the speed of light and is derived from the word 'tachytis' (velocity).

Tachyons have been known for thousands of years when mankind used them in rituals In past centuries, scientists were skeptical of this phenomenon. Knowledge of Tachyon Energy has been with us for at least 40 years, but modern physics finally proved its existence in the 1960s. Today, various scientists verify its existence. We use Tachyon Energy primarily to harmonize subatomic structures and use specific tools for therapeutic treatments.

Tachyon energy was defined by Dr. Gerald Feinberg of MIT in 1966 as a faster-than-light sub-atomic particle. Since the late 1800's, scientists around the world have been working on free energy devices that use Tachyon. It allegedly strengthens the energetic field which is directly linked to the physical body. It then activates and intensifies the structure of the cells, reminding them of their perfect order.
